

Getting Started with AISAP

https://aisap.usacegis.us/aisap_portal/

AISAP Interface

1. **AISAP** – View, add, and edit folders, projects, and areas of interest.
2. **Find Requests** – Search the AISAP data library based on location, dates, and additional fields. Also, select the appropriate data source for each project.
3. **Query Tool** – Request data from the US Coast Guard that are not already available in the AISAP data library. The requested data are added to the AISAP data library.
4. **NAIS Web Services** – View data from the US Coast Guard AIS database in the format selected.
5. **Request Status Lookup** – View the progress status of data requests submitted with the Query Tool.
6. **Help** – View contact information.
7. **User** – Logout or update password.
8. **Base Map** – Change the appearance of the map.
9. **Map Tools** – Use the measurement tool, heat map control, vessel track settings and legend, show/hide map layers, and toggle the width of the two panes.
